

YAHYA TAREK FARAG

GENERAL MANAGER - MANUFACTURING

Manufacturing Operations | Plant Management | Engineering Strategy | Business Transformation

Cairo, Egypt | +20 1099246336 | Y_Tarek91@yahoo.com | linkedin.com/in/yahia-tarek

EXECUTIVE PROFILE

Manufacturing and Engineering Executive with 13+ years of progressive leadership experience across food and beverage manufacturing, factory operations, production support, maintenance, utilities, quality coordination, supply chain interfaces, industrial projects, and multi-site operations. Currently serving as General Manager of Engineering at B.Laban Group, with responsibility spanning three manufacturing plants, more than 200 operational facilities, and a multidisciplinary team of 138 engineers and technicians. Known for translating operational needs into practical improvement programs, including EGP 60M in annual cost savings, a 33% reduction in engineering operating cost, two greenfield factory developments, 50+ turnkey projects, and enterprise CMMS implementation. Targeting General Manager - Manufacturing, Plant General Manager, Manufacturing Director, and Operations Director roles in Egypt.

EXECUTIVE HIGHLIGHTS

13+ Years in manufacturing	3 Manufacturing plants	200+ Operational facilities	138 Engineers & technicians
EGP 60M Annual savings	33% Cost reduction	50+ Turnkey projects	2 Greenfield factories

Leadership scope includes production and factory support, engineering and maintenance, utilities, quality and food-safety coordination, supply chain and warehouse interfaces, CAPEX/OPEX planning, contractor management, and participation in P&L; and operating reviews.

CORE COMPETENCIES

Manufacturing & Plant Operations
Operational Excellence & Continuous Improvement
Production Support & Capacity Readiness
Maintenance Strategy, TPM & Asset Reliability
Utilities, Energy & Facility Management
CAPEX / OPEX and Budget Control

Quality, Food Safety & GMP Coordination
Supply Chain, Warehouse & Procurement Interfaces
Greenfield Factory Development
KPI Governance, CMMS & Performance Dashboards
People Leadership & Organization Development
Executive Stakeholder and Contractor Management

PROFESSIONAL EXPERIENCE

General Manager of Engineering

B.Laban Group | July 2023 - Present

Executive leader for engineering, maintenance, utilities, technical operations, manufacturing support, construction, and asset performance within a fast-growing food and beverage organization.

Scope: 3 manufacturing plants; 200+ branches and facilities; 138 engineers and technicians; engineering budget exceeding EGP 120M annually.

- Lead cross-functional manufacturing support across production, engineering, maintenance, utilities, quality coordination, supply chain interfaces, warehouse infrastructure, and industrial projects to sustain business continuity.
- Reduced engineering operating cost by 33%, generating more than EGP 60M in annual savings through strategic planning, resource optimization, procurement discipline, and CMMS-enabled control.
- Designed and implemented a customized CMMS covering 200+ facilities, strengthening preventive maintenance planning, work-order visibility, asset history, and KPI governance.
- Directed the technical delivery of two greenfield manufacturing factories for Cookies and Chocolate, from concept and equipment selection through installation, commissioning, and production readiness.
- Led restructuring and modernization of the Dairy Manufacturing Plant, including production-equipment integration, reliability improvement, and technical standardization.
- Delivered 50+ turnkey construction and expansion projects across multiple brands while managing contractors, technical scope, procurement coordination, and executive reporting.
- Established preventive and predictive maintenance systems, utilities governance, engineering procedures, and executive performance dashboards to improve equipment reliability and operational control.
- Report to the Chairman on operational performance, strategic initiatives, capital projects, cost optimization, and business continuity risks.

KEY ACHIEVEMENTS

- Cost leadership: EGP 60M annual savings and 33% reduction in engineering operating cost.
- Scale: engineering and manufacturing support across 3 plants and 200+ operational facilities.
- Transformation: enterprise CMMS built and deployed to create consistent maintenance governance.
- Growth: 2 greenfield factories and 50+ turnkey projects delivered across a multi-brand environment.
- People: leadership of 138 engineers and technicians with focus on accountability, capability building, and cross-functional execution.

MANUFACTURING LEADERSHIP POSITIONING

Combines hands-on engineering depth with business-oriented leadership across production continuity, quality and food-safety coordination, supply chain interfaces, utilities, financial awareness, capital projects, and people management. Best positioned for senior manufacturing and operations roles where the mandate is to improve reliability, cost, execution speed, and organizational discipline.

PROFESSIONAL EXPERIENCE (CONTINUED)

Electrical Department Manager

El Abd Foods | *January 2018 - April 2023*

Managed electrical engineering and automation activities supporting food manufacturing operations, expansion projects, and factory reliability.

- Led electrical engineering activities across production assets, plant infrastructure, power distribution, MCCs, transformers, and technical services.
- Designed and commissioned PLC, HMI, and SCADA automation systems supporting production and process control.
- Managed department manpower, budgets, preventive maintenance, capital projects, and technical coordination with production and other functions.
- Improved production reliability through structured maintenance planning, equipment commissioning, and root-cause problem solving.

Maintenance Engineer

El Abd Foods | *October 2015 - December 2017*

- Planned and executed preventive maintenance programs for industrial production equipment.
- Reduced machine downtime through troubleshooting, corrective action, commissioning support, and maintenance standardization.
- Developed maintenance manuals and technical procedures for operating teams.

Electrical Maintenance Engineer

Faragello | *September 2014 - October 2015*

- Managed electrical maintenance activities and supported the installation and commissioning of new production equipment.
- Improved equipment reliability through structured fault finding and preventive maintenance execution.

Electrical Technical Office Engineer

Falcon Power Systems | *September 2013 - July 2014*

- Prepared electrical designs, power-distribution documentation, cost estimates, technical submittals, and project coordination records.

EDUCATION

Bachelor of Science in Electrical Engineering - Power & Control

Alexandria University | *Very Good with Honors* | *Graduation Project: Excellent*
